

Requirements:

- 1.1) `LinkedList2.h` has a class called `LinkedList` with a method called "insert" that satisfies this requirement.
- 1.2) `LinkedList2.h` has a class called `LinkedList` with a method called "remove" that satisfies this requirement.
- 1.3) `LinkedList2.h` has a class called `LinkedList` with a method called "peek" that satisfies this requirement.
- 2) `main2.cpp` has various tests to show that the aforementioned methods are working.
